2004 IARU HF World Championship Results

"Very interesting contest. Never a dull moment. This contest has great rules, and great all-band activity. Hard to complain about a contest that gives you 100/hrs all contest long!"—N9RV

Carl Luetzelschwab, K9LA
Editor, *National Contest Journal (NCJ)*

Pat, N9RV, really seemed to sum up the 2004 running of the IARU HF World Championship on July 10 and 11. The creation of High, Low, and QRP sub-categories under each of the three Single Operator categories (Mixed, Phone-only, CW-only) brought a distinct new flavor to the contest.

Summary

With new categories it is not surprising that the 2004 HF World Championship set a new record for the number of logs received. The 2479 logs received is up 32% from last year, and beats the old record (2105 logs in 2001) by almost 18%. The trend in the number of logs received is increasing.

This year's event had submissions from 49 of the ITU zones. With many ITU zones over open sea, it's obvious that having participation from all zones is not very likely. But a look at an ITU zone map shows that participation from at least 60 zones could be a reality. How about some of you DXpeditioning contesters? Some of the "easier" zones needing activation are 5 (OX), 17 (TF), 46 (9L, 5N, etc), 47 (TT, etc), 51 (P2, YB, H4), and 52 (D2, etc). (See "Zone Participation by Year" graph.)

The zone with the most logs submitted this year was again Zone 28 with 354 logs. Zone 8 followed with 264 logs.

Loud for a reason—Andi, UA3DPX, the 5th place finisher worldwide in the Single Operator Low Power Mixed Mode category.

Tight Races

There were several tight races in the World scores and in the W/VE scores. On the overall world stage, two stand out in particular.

In the Single Operator Phone High Power category, Dimitry, UT5UGR,

edged out Jiri, OK1RI, by only 4.8%. The difference was UT5UGR's 107 more QSOs and 5 additional multipliers. A few multipliers more or less could have tilted the balance in this one.

In the Single Operator CW Low Power category, Nick, UN7MO, in Kazakhstan squeaked by Igor, UA4FER, in European Russia by 4.1%. Although Nick had 277 fewer QSOs and 50 fewer multipliers than Igor, his QTH in Zone 30 gave him enough higher-point QSOs to claim victory.

There were also three tight races among W/VE scores that caught our attention. In the Single Operator Mixed Low Power category, Felix, VE2/DL7FER, took advantage of the points-per-QSO rule to beat Don, W9IU, by 6.9%, even though he had 96 fewer QSOs and 19 fewer multipliers. Higher point QSOs do make a huge difference in this contest.

Single Operator Phone Low Power operator Fred, KK1KW, snuck by Ryan, N8RY, by 6.2% in a tight category. KK1KW had 288 fewer QSOs, but managed to put 41 more multipliers in the log.

In the Single Operator Phone High Power category, there was a close three-way race between George, K5TR; Mitch, K7RL, and Jerry, WB9Z. George came out on top by virtue of having the most QSOs and most zones. But Mitch (thanks to a JA opening on 15 m) and WB9Z weren't too far behind. George's win is his third in the last four years, interrupted only by his participation on the W1AW/5 HQ operation in 2002.

The UN7MO versus UA4FER results and the VE2/DL7FER versus W9IU results show that carefully picking your QTH for the contest can mean the difference between first place and second place.

QRP Scores

The results by power level (see table) in the Single Operator Mixed and Phone categories nicely follow the power level. But the CW category scores show an exceptional effort by Simon, HA5IW, in the QRP category.

HA5IW had enough QSOs and multipliers not only to take First Place in the SO CW QRP category, but he also even squeaked by the SO CW Low power winner Nick, UN7MO. This was a great effort indeed! I have asked Simon to consider writing an article for *NCJ* (the *National Contest Journal*) about his outstanding QRP effort.

HQ Stations

Congratulations to the DAØHQ team for their First Place finish. Second Place went to the SNØHQ team. The difference between these two groups was only 4 multipliers, but DAØHQ had about 4700 more QSOs. These two stations mobilize the members of their IARU societies to get on the air.

Europe led the pack with 28 HQ stations. Asia had 6 HQ stations (8NxHQ took top Asia honors), North America had 4 HQ stations (W1AW/Ø took top honors), South America had 3 HQ stations (P4ØHQ took top honors), and Oceania had 1 HQ station.

IARU Stories in *NCJ* and in the Web Version

The November/December 2004 issue of *NCJ* contains two narratives of IARU contest efforts: SNØHQ by SP5UAF and IK2DZN by IK2DZN. In the same issue, WØCG's wife Cindy contributes her interesting observations of the PJ2HQ operation. The January/February 2005 *NCJ* has snippets about the contest compiled by N3BB. All of these are also available on the Web version of this report.

Also be sure to check out the "2004 IARU HF World Championships" soapbox comments at **www.arrl.org/contests/soapbox**.

Propagation

This year's contest was blessed with quiet geomagnetic field activity (the planetary K index Kp remained at or below 3 throughout the entire contest period) and low solar activity (no X-ray flares were observed on Saturday and only a magnitude C4.2 flare was observed right at the end of the contest on Sunday). The smoothed sunspot number for July 2004 is expected to come in at around 40, so for all intents and purposes this determined the propagation conditions for the contest.

"20 was a real workhorse and it was open all the time from here. I think I missed at least a dozen mults by not spending enough time on 15 and 10."—VE3EY

This comment from VE3EY is what would be expected of the summer ionosphere for stations in the northern hemisphere. With summer daytime MUFs (maximum usable frequencies) being lower than winter daytime MUFs, the number of QSOs on 15 and 10 m would be significantly fewer. And with longer hours of daylight during the summer, the number of QSOs on the lower bands would suffer, too. [See the "QSOs by Band" graph.] Obviously many people spent lots of time on 20 m.

"Mother nature gave us a nice lift at 1 AM Sunday morning with a rip-roaring JA opening on 15m. That little surprise added about 250 five-pointers to the log during what is typically a slow period. It sure pays to check those would-be dead bands."—K7RL

The surprise 15 m opening from Washington State to JA is a little tough to explain without digging very deeply into space weather and ionospheric data. Regardless of how it happened, it's a reminder that we don't know everything. If you have an extra receiver available, next year it might be beneficial to let it sit on the NCDXF/IARU beacon frequencies to catch any of these unusual openings.

2005 Contest

The 2005 IARU HF World Championship will be held the weekend of July 9-10. The announcement will be published in the April 2005 issue of *QST* and the full rules will be found on-line at **www.iaru.org/contest.html**. Hope to see you in the 2005 event!

Scores are sorted first by ITU Zone then by ARRL\RAC Section or DXCC entity with in the zone. For US stations, they are sorted first by US call area within the zone. Next they are sorted by operating category (A=Single Op Mixed Mode, B-Single Op Phone Only, C=Single Op CW Only, D=Multioperator) then by power for single operator categories (A=QRP, B=Low, C=High).
