

# Results, 1989 IARU HF World Championship

By Billy Lunt, KR1R and Mark R Burke, KA1MIS  
Contest Manager Contest Assistant

This year's IARU HF World Championship was held during the weekend of July 8-9, 1989. Dan, W7WA, finds that "summertime propagation makes this contest quite different from spring and fall contests." Even though the IARU HF World Championship may be quite different, good propagation was reported from all continents. KO9Y found, "The signals were strong with great openings throughout the night, even on the high bands." Hein, DL2OBF, had great fun and reports, "Wow! Nearly 700 QSOs in about 17 hours! All bands were open! Wait till next year, I will make 1000 QSOs." Even with all the good reports, 10 and 15 meters surfaced as the bands that produced the largest QSO totals. Multiop-station UQ0A claims, "We heard the US on 15 meters all 24 hours of the contest. There were nice pileups on 15 meters." IO4UFH conveyed, "Fantastic propagation to the US on 15 meters during the night!" WA2IUO was excited about "a great JA long-path opening on 10 meters during Sunday morning."

Contesting has the ability to draw casual operators into the main stream of the contest. Like many a casual operator, KC8WR relates, "I started out just giving other stations a few QSO points." Then the "contest bug" bit and Michael started going full bore and had a ball! His only resentments were that "if I had known the 'contest bug' would bite so hard, I would have taken a nap and operated the entire contest."

Activity increased for the 1989 contest with Box AAA receiving a total of 1477 logs. The CW-only entry category remains the most popular, with the phone-only entry category as the next favorite, followed by mixed-mode and multioperator.

Fourteen IARU member-society HQ stations submitted their logs. HG89HQ set a new record with 10 million points for first place. Second-place Y61HQ scored 8 meg followed by LZ7A with 6 meg. Thanks to all the HQ stations that participated and gave out those extra multipliers.

The entire top ten in the world mixed-mode category scored over a million points as opposed to only the top six places in 1988. Gyozo, HA0MM, tried the mixed-mode category this year and finished on top, scoring 1.9 million points. 5H3TW (K3TW, op) finished second with 1.46 meg, with OK1RI close at his heels with 1.41 meg for a respectable third place. Rich, K1CC, took top state-side honors and finished sixth worldwide, scoring 1.2 meg. Seventh-place worldwide and

second-place W/VE went to veteran K3ZO, with 1.1 meg.

ZP0Y (ZP5JCY, op) scored over 2 million points to take first-place in the world phone-only category. C40A (5B4MF, op) finished in second place scoring 1.6 meg, and RB5MT finished third with 1.4 meg. Dan, W7WA, mustered 1.2 meg to finish in first place on W/VE phone-only and fifth place worldwide. Jack, W1WEF, finished second among W/VEs and sixth worldwide with 1.0 meg.

UW0LT moved up the ladder from sixth place in 1988 to win first-place worldwide CW, scoring 1.2-million points. RL7AB racked up 1.1 meg for a strong second-place finish. Dan, K1TO, mustered 1.0 meg for third-place worldwide and first-place W/VE. Jeff, KR0Y, stayed at home this year and secured fourth-place worldwide and second-place W/VE with close to 1.0 meg.

In the multioperator category, the top four scores were all from the USSR and were well over 2-million points each. Contest team, UC1OWA edged out rival RB8M for the top worldwide honors with RQ7W finishing third in the multioperator category. K6TMB moved up from sixth-place W/VE last year to finish

first among W/VE multiop entries. N5AN finished second for W/VE and N8CXX third.

This summertime contest provides plenty of activity from around the world and with the 24-hour format, you still have time left over to spend with the family. If you haven't tried it, give the next one a whirl and see how you stack up against the worldwide competition. See you in the fifth IARU HF World Championship on the weekend of July 14-15, 1990.

Spyros, C40A (5B4MF, op), finished second-place world phone-only from Cyprus.

Alfredo, CU2BR, pictured with his dog, operated mixed mode from the Azores.

Sergio, IK4AUY, finished first-place phone in Italy.

## SOAPBOX

Great contest! This was my first try at this one. I still enjoy contesting with no gadgets, computers and etc. I hope to get more than ten hours in the contest next year (W7HS). The IARU contest seems to be popular everywhere except in the US (W7WA). Sure was a nice European opening on 15 meters! I enjoy the 24-hour format. See you with more activity next year (N0AX/7). Wow! Conditions were superb! I had a great time. Thanks to K8CC for the use of his logging program (KR0Y). All my contacts were made using attic dipoles (NZ5V). I had a good time missing out on my sleep! This is the first time that I have entered a contest. The bands were not very cooperative in opening worldwide. Twenty meters was really dead to the west with no ZLs and only one VK (W0VKP). FB contest! I like the 24-hour format (WF5E). It was a lot of fun and was my first 24-hour contest. I drank lots of coffee. The only casualty was my preamp. It got zapped with RF around 2 AM. See you next year (KA1J). Good contest! I was glad that I stayed home for the weekend (W1WEF). Good conditions and interesting DX! I wish that I had more time to operate in the contest. Wait till next year (KB1BE). I thought that I was in the Everglades. There were so many "alligators" about! (KT2D). Good activity, beautiful weather, tough choice, I went 50/50 outside and on the air (K3WW). Thanks for sponsoring the contest. I would like to see it moved to lower QRM months (K4PQL). Incredible conditions to Japan from central Florida all night! Thanks to the JAs for standing by during checks for other parts of the world (AB4CQ). This was my first CW contest in 10 years. I had a great time! I missed some operating time due to a receiver failure. Murphy was born in my house! (WI8W). It was basically a three-band contest here. I have no antennas for 160, 80 and 10 meters. I didn't miss them; 15 meters was open for all 24 hours. Enjoyed it! (N9AG). Last year, we went 57 days without rain. Guess which weekend the drought broke. I was off the air for four hours with thunderstorms! Had a great time anyway (KO9Q). Excellent contest but what happened to 10 meters? Why did I fall asleep two hours before the end? (XE1THR). Conditions were not good. Fifteen meters was the best band. There was a great deal of aurora activity to the north (LA5QFA). Ten meters: poor conditions; fifteen meters: excellent conditions; twenty meters: in-between (LA2AD). I couldn't believe the pileups on 15 meters! Super conditions and great fun! (OH6NIO). A national ham meeting and no beam for 20 meters resulted in limited operating time in the contest. Super propagation helped me to make nearly 1400 QSOs in about 12 hours! (OH1AF). Thanks for FB contest. GL and 73 (OH7NW). Thanks for the nice test (OH3OJ). I worked eight new prefixes! (OZ7AX). GL! DX! 73! (UA1OAM). Very enjoyable as it was my first contest. I wasn't

able to operate all the time as a new baby daughter played havoc with the household that evening (E16GP). What an excellent contest! CW operation was down a bit due to the chief CW operator twisting his ankle while chasing a wild goat away from the mast guy ropes at four in the morning! Luckily he can send with the other foot but not as fast! See you next year (E11D). I was only able to operate for half of the contest. I found 21 and 28 MHz quiet (GM4ZFE). No activity on the low bands! See you next year (ON6AH). A good contest, but a great deal of QRN (PA0IJM). Nice contest as usual (PA3EOB). The contest was fun. I did well for my poor rig and antenna. See you next year (DF1LX). This was my first time in this contest. It was very interesting (DF8WS). Good conditions with much QRM, but it was one of the best contests (DL8PC). It was great fun working in the contest. I would have loved to be QRV for 24 hours, but I had to work the weekend (HB9CSA). It was fun (HB9CVO). Thanks for the interesting contest. I hope for a better score next year (IKSIU). Wonderful conditions, but a local thunderstorm didn't allow a good job on the low bands (I2VXJ). During the night, the propagation was beau-

Gyozo, HA0MM, finished first-place world mixed mode using these antennas

tiful to the US (IN3ZNR). Next time, I will have a better 15-meter antenna. It was practically a single-band contest, and 15 meters is my worst band

(OK1RD). We had bad conditions and thunderstorms (SP9MRO). This was my first IARU contest. It was fun. I hope to do better next time (YO5BO). Very

good contest! (YO2DFA). Extremely bad propagation! (RV6AF). Thanks for the nice contest (UA4LU). Thanks for FB contest (UA6LQ). Many thanks for the nice contest! It was my first championship (UA3RMN). Thanks for contest (UA3YAO). FB contest! (RVIACF). Sincere thanks for the fine contest. I hope to enter again next year (UA6EED). Thanks for the nice contest (UZ4CYJ). Thanks for the contest. The conditions were very good (RB5MT). This was my first time in the IARU championship. It is a very dynamic contest (RC2AZ). Great contest! Does anybody need zone 29? (UC2AB). Very FB conditions in Northern Europe (UQ2GD). Thanks for the nice contest QSOs (UQ2PP). FB contest (UR2RND). Thanks for the good contest (UA9CBO). I did not have good conditions! Hope they are better next year (UW9CP). Cheerio! (RI8BN). Thanks for the very nice contest (UL7MU). The conditions were very poor for this important contest especially on 28 and 14 MHz (CT1BWW). Nice contest (EA7AAW). Very, very tired! (JI1UTP/J). Good conditions for 10 meters! (JA1AAT). This is my first time in the contest (JR1TFR). The conditions and activity were not very good on 10 meters (JE1CKA). I was amazed when K3ZO called me on 28 MHz at 0749Z! Great conditions on all bands including many long-path openings (5H3TW). This was my first time in the contest. See you next year (VK8XX). There seemed to be plenty of activity, just a pity some stations don't spend a little more time listening between their CQs! Good to see 10 meters coming to life (ZM2AGY). Thanks for the FB contest! Greetings from FJL (UA9BEZ/UA1O). Thanks for the nice contest .73 from FJL (UA1OT).

## Scores

Scores are listed by ITU zone and then by country within that zone. The line score indicates the call sign, final score, QSOs, multipliers and entry class. The entry class letters indicate: A = single operator, mixed mode; B = single operator, phone only; C = single operator, CW only; D = multioperator, single transmitter.
